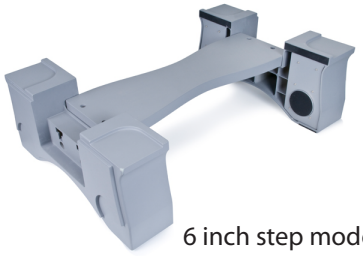
Multi-function Step Board

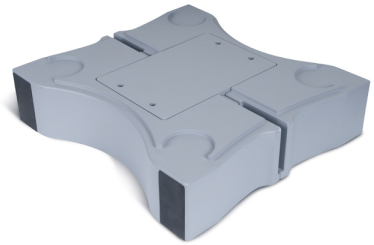
for Wiifit™ Balance Board

Wi-MSTE

3 inch step mode



6 inch step mode



Aerobic step mode

Give your Wii Fit aerobic workout even more of an extra boost with the double step Aerobic Platform for Wii Fit. The average Aerobic Step Platform stand would be placed under your Wii Fit balance board, elevating it to a full 4 inches from the ground, a standard height for actual step aerobics. However this platform can adjust to two different height levels by laying it flat horizontally or turning it on its side vertically, taking it to 6 inches in height! For a secure grip to many surfaces, the double step platform has rubber pegs on both the bottom and sides of the platforms, plus a tablet in-between to hold them together. With the double step Aerobic Platform you'll be performing step aerobics exercises on the Wii just like you would at any expensive Gym without the pricy memberships!

Features include:

- Attaches to the bottom of the Wii Fit balance board
- Can be placed flat horizontally or on its side vertically
- Rubber pegs under and on the side of the platform
- Adjusts from 3 inches to 6 inches in height

Wii fit Balance Board not included
